## **DETAILED ACTION**

### ***Election/Restrictions***

- I. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 16-19 drawn to a method of identifying a candidate RAC pathway modulating agent.

Group II, claim(s) 13-15, 20-22 drawn to a method for modulating a RAC pathway of a cell comprising a cell defective in RAC function.

Group III, claim(s) 23-25, drawn to a method for diagnosing a disease.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions of groups I-III are found to have no special technical feature that defines a contribution over the prior art of Baker et al. (US 20050079518).

The last claimed invention in the instant case is a method for diagnosing a disease in a patient by assaying the level of MELK expression. Baker et al. teach measuring the level of MELK in cancer patients for diagnosis purpose (See PG-Pub section 0014, 41-45, 136). Therefore, applicant's invention does not contribute a special technical feature when viewed over the prior art of Baker et al. Accordingly, the inventions of group I-III as well as those of target genes

Art Unit: 1641

recited in the instant claims do not have a single inventive concept and so lack unity of invention, and therefore the restriction for examination purpose as indicated is proper.

2. The inventions listed as Groups \*\*\* do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: \*\*\*.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
